Quantum®

CONTENT PRODUCTION JUST GOT EASIER

From set to post, StorNext offers a true, collaborative shared storage environment across your entire production workflow.

ADDRESSING COMPLEX WORKFLOWS AND FAST PRODUCTION DEMANDS

Today, every business communicates their vision, products, and brands with rich content—and in more and more mediums than ever before. With the demand for content surging, content publishers, broadcasters, sports organizations, learning establishments, and corporate teams all need to produce and deliver videos and other visual content at a mind-boggling pace. And, with the workflow to take a project from start to finish becoming more complex, creative teams struggle to produce and deliver multiple projects simultaneously. Add the faster tempo of mission-critical deadlines, and it's imperative to provide an environment where they can collaborate remotely, effectively manage content sprawl, and preserve their work to leverage in the future.

PRODUCING CONTENT JUST GOT EASIER

The Quantum H4000 Series is a new line of appliances that simplify how organizations manage, store, and protect their video content. The H4000 solution combines the latest hardware technology with Quantum's signature StorNext® software, the world's fastest file system for video workloads, enabling entire teams to produce content faster.

H4000 with StorNext makes it easy to:

- Collaborate across entire production workflows, faster, and from any location.
- Control content sprawl and consolidate assets into a single platform.
- Produce content closer to capture—whether at the edge, in the studio, or on location.
- Store and protect raw assets and finished projects on a single platform for future enrichment, analysis, and use to fuel future projects.

SOLUTION BENEFITS

- **Faster production collaboration.** The fastest file system on the market for video workloads provides efficient shared access, allowing your creative pros to collaborate seamlessly to deliver a polished, final product.

- **Produce content where it's captured.** A compact design with powerful software makes content available where it's needed—on the set, in the editing suite, or at home—keeping production moving smoothly to deliver content faster.

- **A single data-storage platform.** Intelligent software allows you to easily manage content sprawl by consolidating raw and finished assets onto a single platform that protects it and makes it available now—and in the future.

SOLUTION BRIEF

SOLUTION: ENABLING A COLLABORATIVE PRODUCTION WORKFLOW ENVIRONMENT IN MORE PLACES THAN EVER BEFORE

Quantum H4000 with StorNext software is a compact, powerful solution that is simple to set up and deploy anywhere, making the hassle of downloading, uploading, and file transfer a thing of the past.

H4000 with StorNext is built for production.

- Collaborate seamlessly with a purpose-built shared storage environment.
- Set up this compact solution in minutes, on set, at the edge, or in your private cloud.
- Reduce overhead costs with less hardware and maintenance.
- Eliminate file latency with the fastest video streaming on the market.
- A solution that grows as you grow with a converged, virtualized, and cloud-ready solution.

StorNext File System
The StorNext software system manages data through its lifecycle, delivering the right balance of high performance, data protection and preservation, scalability, and cost.

StorNext 7 on the Quantum H4000 Series
StorNext 7 is now converged, virtualized, and cloud-ready on the Quantum H4000 Series of appliances.
