ObjectMatrix

Connecting People with Media

Access to media archives has never been easier

Object Matrix is a media-focused object storage platform that benefits organizations, financially and operationally, by modernizing video workflows and providing instant access to all media assets.

Why Choose Object Matrix?

· Self-serve access to content from anywhere

· Predictable cloud workflows and economics

· Security and governance first

· Future-proof and access

· Enhanced metadata and business rules support

· An easy-to-use product, not an inhouse project

· Satisfies all stakeholders with total flexibility

· Fantastic ROI

· Find, share, secure and audit

· Dedicated to the media industry and world-class support

"

Working with Object Matrix has truly been phenomenal, if you are already at the point of looking at these solutions then I'd recommend you move forward quickly on that path. Object Matrix takes care of the customer better than anyone I've ever dealt with."

Patrick Gulotta
VP of Technical Operations

INTER SPORT

Bridging the Gap Between Creatives & Content

Object Matrix simplifies the complex by providing the highest levels of digital content governance (audit, immutability, etc.), multi-tenancy, analytics, metadata management, search, sharing, and collaboration in a package that is easy to manage and even easier to use.

On-Premise

The media-focused object storage platform with built-in security, analytics, and intuitive interfaces providing future-proof access to your content from anywhere?

Quattro

A compact and powerful storage appliance with built-in media applications and multi-cloud support?

Cloud (UK)

The revolutionary media-focused cloud storage platform that gives you instant access to your content via intuitive media interfaces and provides predictable commercials with no egress fees.

Search, Access, and Share all your production and archive content with ease

Vision is a web-based media and metadata management application that puts content in the hands of creative professionals where and when they need it.
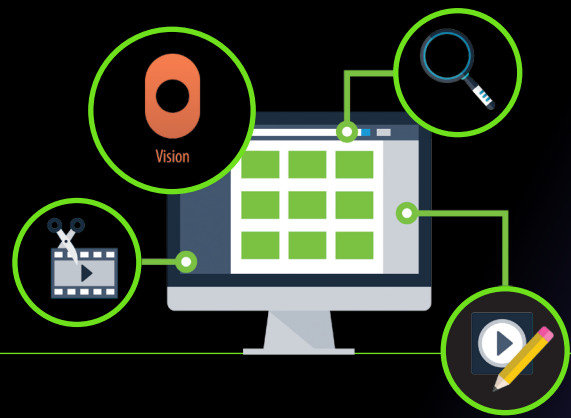

- Increase productivity by enabling creative teams and customers to self-serve content from anywhere

- Metadata forms and extraction ensures your content can be found at any time

- Secure and audited access ensures your content will be protected and only accessed by those with permission to do so

Integrated into media workflows since 2009, ensuring content and metadata is protected on a secure, fast, and scalable archive platform
